Rainfall

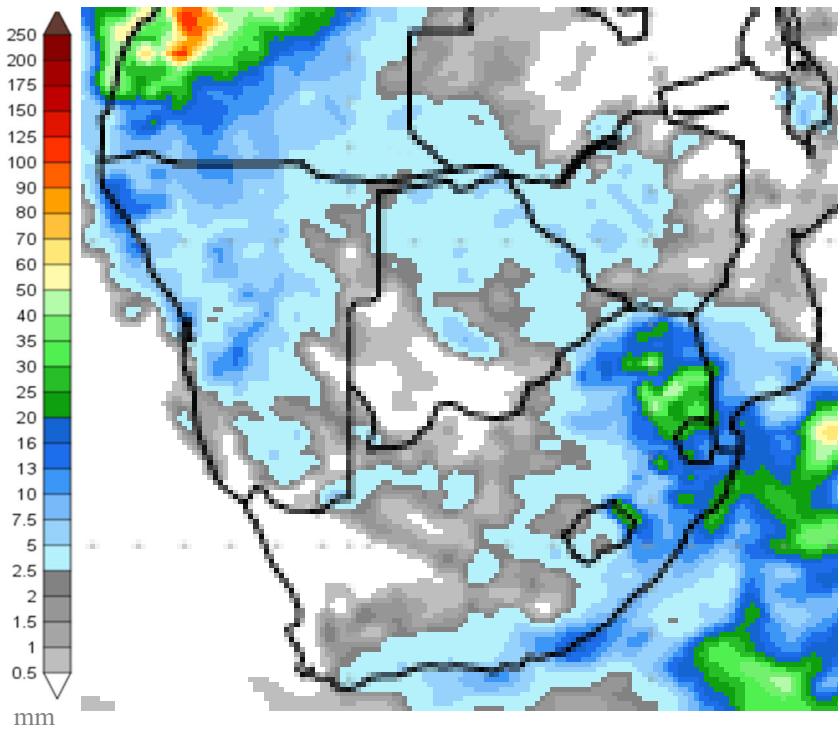

Figure 3: Precipitation for Tuesday 25 October 2016 to Wednesday 2 November 2016

More rainfall is expected for the summer rainfall region this coming week, however it is expected to be less in comparison to the previous week. Parts of north eastern Mpumalanga will receive up to 30mm of rain while Limpopo and northern KwaZulu-Natal will receive between 10 to 20 mm. Gauteng, Free State and areas along the coastal regions will receive between 2 to 10 mm.

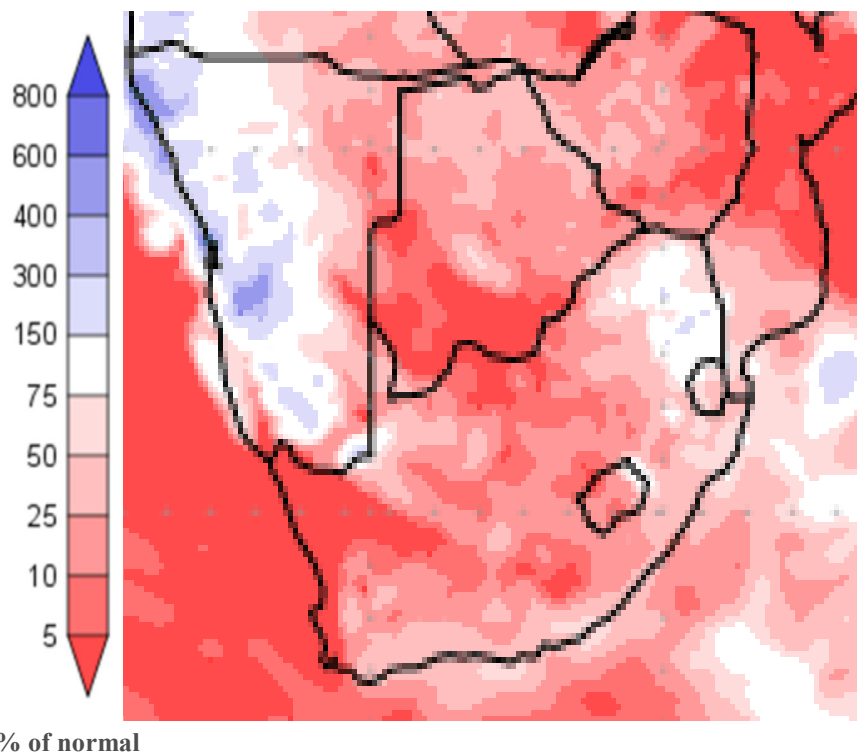

Figure 4: Precipitation (% of normal) for Tuesday 25 October 2016 to Wednesday 2 November 2016

Normal rainfall is expected over Limpopo and the north eastern region of Mpumalanga. Rainfall over the rest of South Africa will be below normal.

Precipitation forecasts from the **National Centers for Environmental Prediction.**

Normal rainfall derived from CMAP monthly climatology for 1979 – 2003
