Weekly Weather Forecast

## Weekly Outlook - 15 November 2016

### Temperature

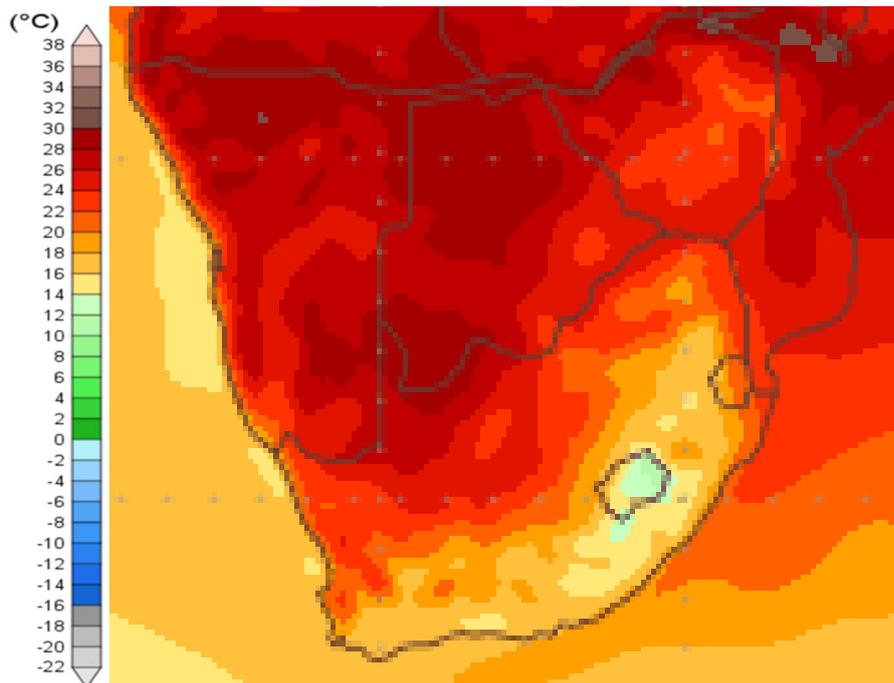

Figure 1: Mean surface temperature from Tuesday 15 November to Wednesday 23 November 2016

Temperatures of 20 to 24°C (dark orange to red colours) are expected along the northern regions of South Africa, while cooler temperatures between 14 to 20°C are expected along the coastal areas of South Africa (yellow to light orange colours).

#### Note:

Temperatures reflect the average temperatures which includes both minimum and maximum temperatures for a day over an 8 day period.

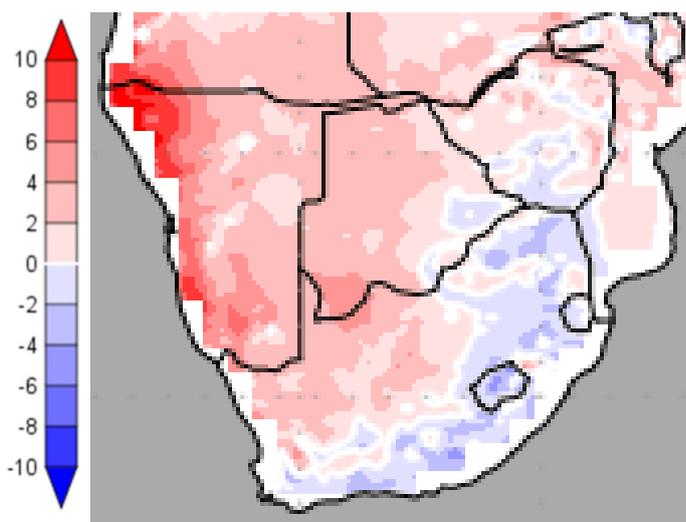

Figure 2: Temperature anomaly for Tuesday 15 November 2016 to Wednesday 23 November 2016

The Northern Cape, North West and the south eastern parts of the Free State can expect warmer than normal temperatures for the coming week. The rest of South Africa, Mpumalanga, Gauteng, Limpopo, KZN, Eastern and Western Cape can expect cooler than normal temperatures with normal temperatures expected along the coastal regions.

Temperature forecasts from the **National Centers for Environmental Prediction**.  
Normal Temperature derived from CRU monthly climatology for 1901 – 2000

# Rainfall

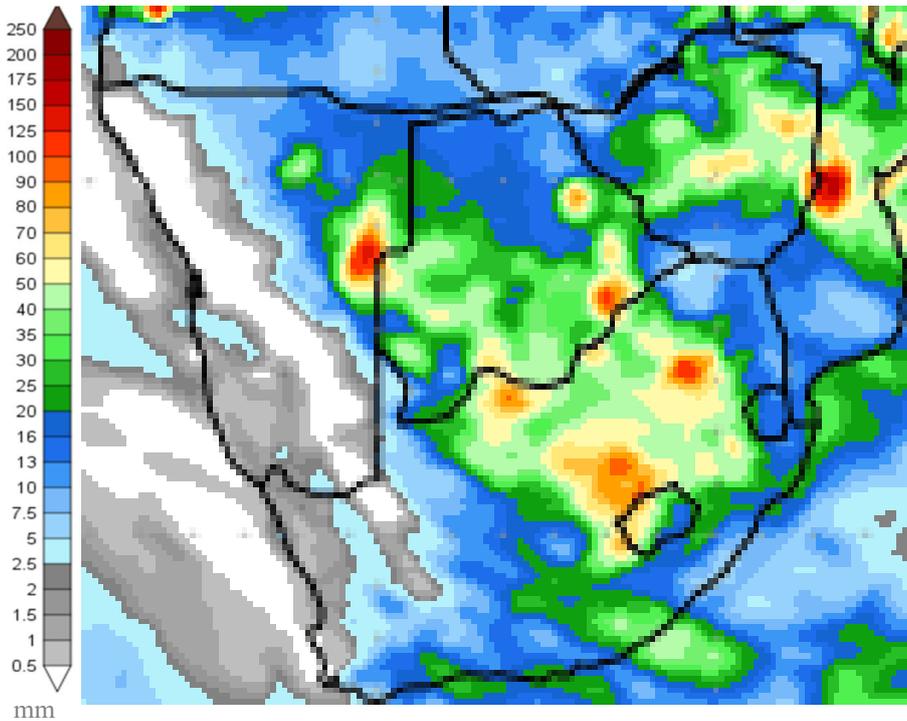

Figure 3: Precipitation for Tuesday 15 November 2016 to Wednesday 23 November 2016

Slightly lower amounts of rainfall is expected over the summer rainfall region this week with a cold front also bringing rainfall to parts of the Western and Eastern Cape. Up to 80mm is expected in large parts of the Free State, with isolated areas in Gauteng and Mpumalanga also expecting between 50 to 80mm. North West will receive between 30 to 50mm. The rest of South Africa will receive between 10 to 20 mm.

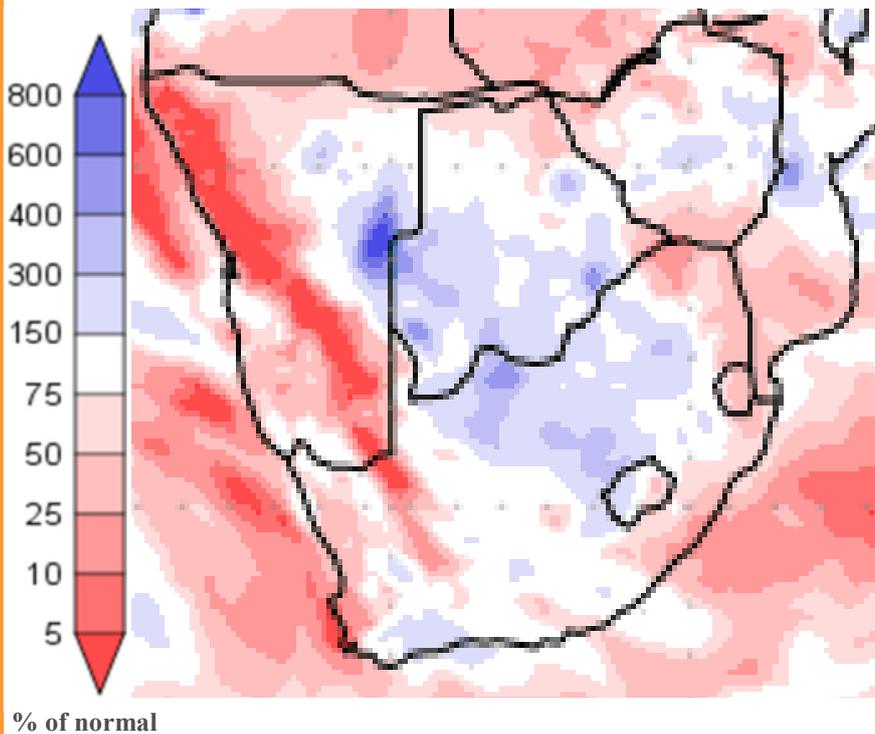

Figure 4: Precipitation (% of normal) for Tuesday 15 November 2016 to Wednesday 23 November 2016

The rainfall anomaly map for South Africa for the coming week looks positive for most areas of the country. Only the northern part of Limpopo, the KZN coast and west coast will receive below normal rainfall. The rest of the country will receive normal rainfall with parts of the Northern Cape, Free State, North West, Gauteng and parts of Mpumalanga that will receive above normal rainfall.

Precipitation forecasts from the **National Centers for Environmental Prediction.**

Normal rainfall derived from CMAP monthly climatology for 1979 – 2003
