Weekly Weather Forecast

Weekly Outlook - 13 December 2016

Temperature

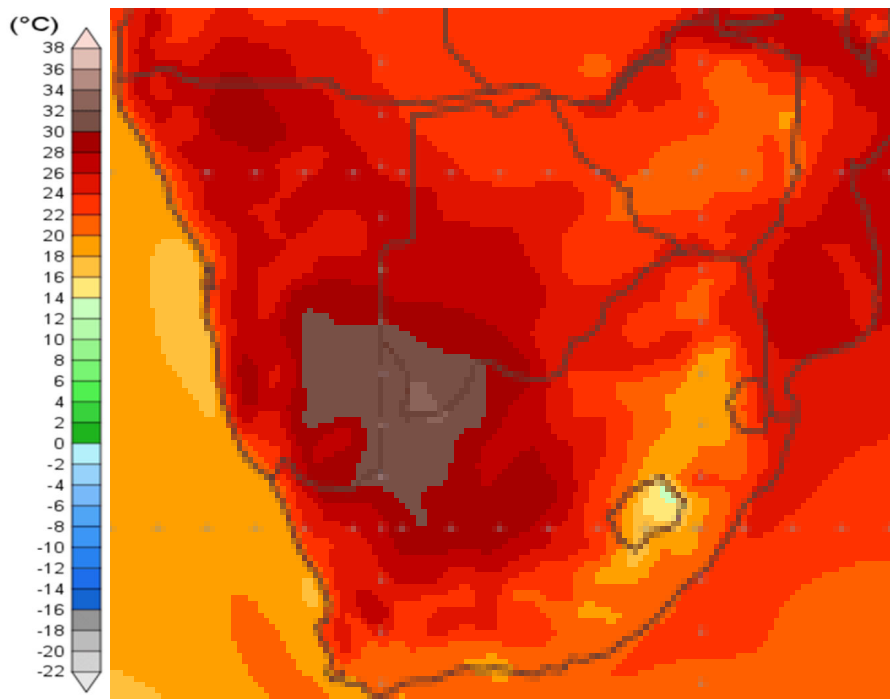

Figure 1: Mean surface temperature from Tuesday 13 December to Wednesday 21 December 2016

Extremely hot conditions are expected during the coming week over most parts of the Northern Cape, with temperatures likely to reach 32°C. During the same period, temperatures in the rest of South Africa will be in the region of 26°C or less.

Note:

Temperatures reflect daily average temperatures over an 8 day period.

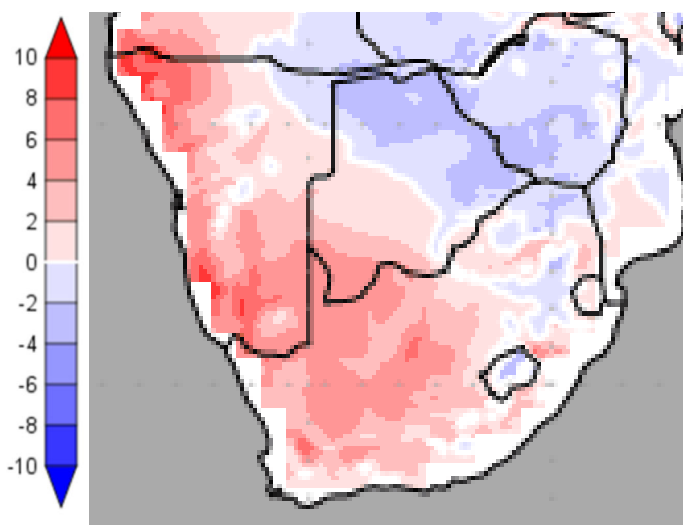

Figure 2: Temperature anomaly for Tuesday 13 December to Wednesday 21 December 2016

Although higher than normal temperatures are expected for most parts of South Africa, the areas, shown in blue (Limpopo and Mpumalanga), can expect slightly lower temperatures. The coastal regions can expect normal temperatures for this time of year.

Temperature forecasts from the **National Centers for Environmental Prediction**.
Normal Temperature derived from CRU monthly climatology for 1901 – 2000
