Weekly Weather Forecast

Weekly Outlook:

Rainfall: 28 November to 4 December 2017

Predicted rainfall for
28 November to
4 December 2017

mm

AGRICULTURAL
INTELLIGENCE SOLUTIONS

Figure 1: Expected precipitation - 28 November to 4 December 2017.

Good rainfall is expected over large parts of the summer rainfall region. Large parts of KwaZulu-Natal and the northern Free State can expect more than 60 mm. Limpopo, however, will be dry this week with only isolated showers expected in the southern parts of the province. No rain is expected for the Northern and Western Cape. Northern regions of the Eastern Cape will receive good rainfall this week while the southern parts of the province will remain dry.

Average Minimum Temperatures: 28 November to 4 December 2017

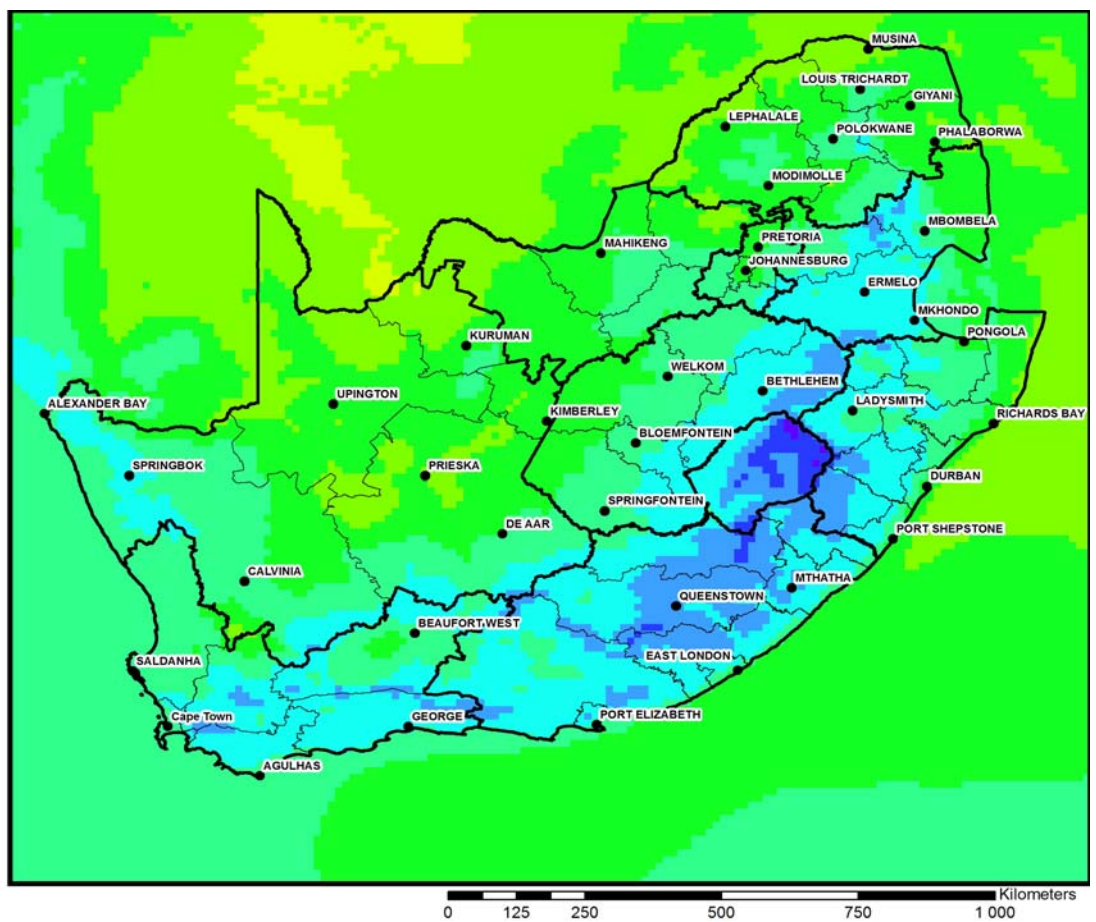

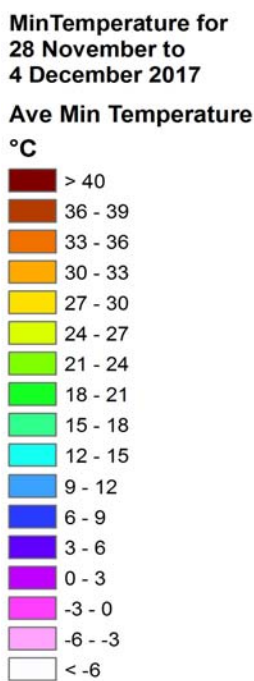

Figure 2: Average Minimum Temperatures - 27 November to 4 December 2017.

Cold mornings are something of the past with minimum temperatures now above 10°C for most parts of South Africa.

Average Maximum Temperatures: 28 November to 4 December 2017

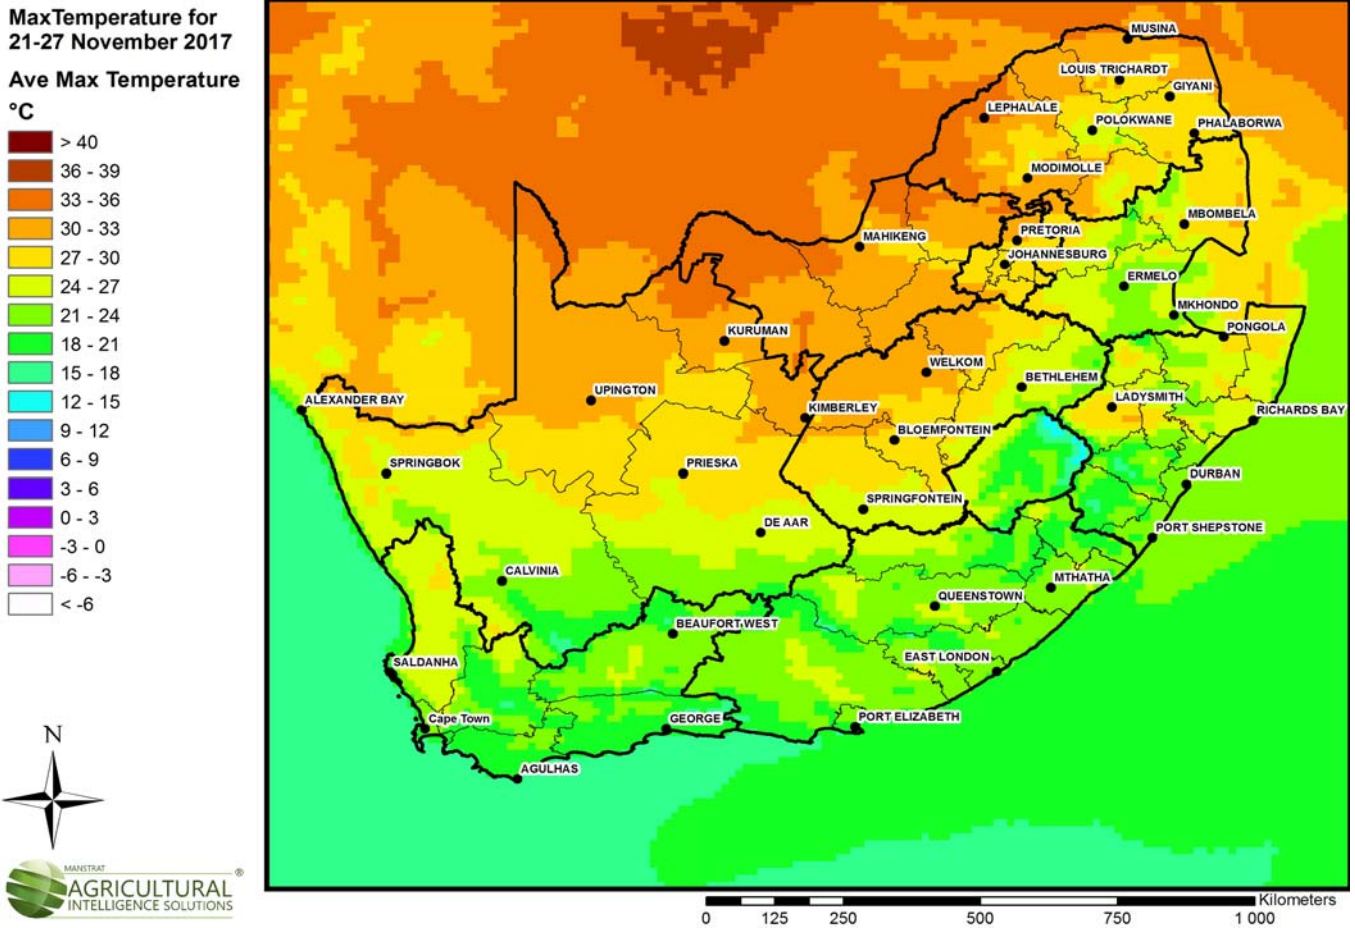

Figure 3: Average Maximum Temperatures - 28 November to 4 December 2017

While the coastal regions, southern South Africa and escarpment will experience mild maximum temperatures this week, the northern regions will experience warm temperatures above 27°C.
